PROFESSIONAL SUMMARY

Software Engineer with 15 months of experience designing and building enterprise and full-stack applications. Primary technologies include Java, Spring Boot, REST APIs, SQL, MySQL, React.js, TypeScript, and JavaScript. Contributed to 5 enterprise projects and delivered 7+ SPFx web parts covering application development, backend/API integration, database operations, debugging, performance improvement, and maintainable code.

TECHNICAL SKILLS

Programming Languages: Java, SQL, TypeScript, JavaScript, C++

Backend Development: Spring Boot, Spring MVC, Spring Data JPA, REST APIs, Node.js

Frontend Development: React.js, SharePoint Framework (SPFx), HTML5, CSS3

Databases: MySQL, SQL Queries, Relational Databases, CRUD Operations, Data Persistence

APIs & Platforms: RESTful Services, Microsoft Graph API, SharePoint Online

Tools & Cloud: Azure Functions, Git, GitHub, Postman, Jira

Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

PROFESSIONAL EXPERIENCE

Software Engineer | AVASOFT, Chennai | Feb 2024 – Apr 2025 | 15 months

- Contributed to 5 enterprise software projects, delivering application features, maintenance changes, integrations, and defect fixes across business workflows.
- Created 7+ SharePoint Framework (SPFx) web parts with React.js, TypeScript, HTML5, and CSS3, using reusable components and maintainable frontend structures.
- Connected enterprise applications with Microsoft Graph API, SharePoint Online, and REST APIs for business-data retrieval, updates, and workflow operations.
- Worked across frontend, API, and database layers to connect user workflows with backend services and SQL-based data operations.
- Applied clean coding practices and reusable component patterns to reduce duplicated UI logic across related application features.
- Analyzed and debugged defects across UI, API, and data flows, identifying root causes and delivering targeted fixes.
- Reviewed application behavior and database operations to identify opportunities for performance improvement and reliable data handling.
- Collaborated with cross-functional teams in Agile development through requirements analysis, implementation, testing, defect resolution, and releases.

PROJECTS

E-Commerce Platform | Java, Spring Boot, React.js, TypeScript, REST APIs, MySQL, Spring Data JPA, Razorpay

- Designed a full-stack e-commerce application supporting 3 user roles: customer, vendor, and administrator, with authentication and role-based access control.
- Built Spring Boot REST APIs for product, category, cart, order, search, filtering, vendor, and administration workflows.
- Connected React.js and TypeScript pages with backend services and implemented database-backed flows using MySQL and Spring Data JPA.
- Mapped page-level data requirements to SQL queries and persistence operations for structured retrieval and updates.
- Integrated Razorpay for demo payment processing within the order workflow.

Advanced URL Shortener | Java, Spring Boot, Spring Data JPA, REST APIs, MySQL, Base62

- Engineered a URL shortening service using Base62 encoding to generate compact identifiers and support URL redirection.
- Added duplicate-URL detection and persistent URL-to-code mapping using Spring Data JPA and MySQL.
- Exposed REST endpoints for URL creation, lookup, and redirection using separated controller, service, and persistence layers.

NutriScan – Product Nutrition Scanner | Java, Android, REST APIs, MySQL

- Built an Android barcode-scanning application that retrieves product nutrition information through external REST APIs.
- Processed API responses and presented product information through RecyclerView for efficient data display.
- Handled network communication, response processing, and data persistence using Java application components.

EDUCATION

Bachelor of Technology in Computer Science and Engineering | Bharath Institute of Higher Education and Research, Chennai | 2020 – 2024

CGPA: 8.7/10 | Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

ACHIEVEMENTS

- Solved 200+ coding problems across LeetCode and HackerRank.
- 15 months of software engineering experience across 5 enterprise projects.
